DRAFT SEA FISHERIES (MINIMUM SIZE LIMITS) (JERSEY) AMENDMENT NO. 2 REGULATIONS 202- (P.87/2025) – CHILDREN’S RIGHTS IMPACT ASSESSMENT

**Presented to the States on 14th October 2025
by the Minister for the Environment**

STATES GREFFE

CHILDREN'S RIGHTS IMPACT ASSESSMENT (CRIA)

PART 1: SCREENING

Name and title of Duty Bearer:	Deputy Steve Luce, Minister for the Environment
Type of Duty Bearer: (Minister, Elected Member or States Assembly Body)	Minister
Assessment completed by (if not completed by duty bearer):	Marine Science & Research Manager
Date:	09 October 2025

1) Name and brief description of the proposed decision The subject of your CRIA may be a proposed law, policy or proposition and in accordance with the Law is referred to in this template as the 'decision' • What is the problem or issue the decision is trying to address? • Do children experience this problem differently from adults?
The proposition seeks to amend the Sea Fisheries (Minimum Size Limits)(Jersey) Regulation 2001 to the update the current minimum size of Scallop (<i>Pecten maximus</i>). These measures, if approved, will allow for improved management of marine resources in territorial waters. Children do not experience this differently from adults.
2) Which groups of children and young people are likely to be affected? Groups of children could include early years, primary or secondary education; young adults; children with additional learning needs; disabled children; children living in poverty; children from particular ethnic backgrounds; migrants; refugees; care experienced children and LGBTQ+ children
There are no specific groups of children or young people effected by this proposition. Children and young people that go fishing (either recreationally or intending to do so commercially in the future) will have to follow the size limits that are in force at the time (current ones in the 2001 Regulations or those proposed in this proposition, if adopted).
3) What is the likely impact of the proposed decision on children and on their rights? • Identify any potential positive OR negative impacts and include indirect impacts on children and their rights as described in the UNCRC • Will different groups of children be affected differently by this decision?
This proposition, which seeks to improve the management of important local stocks, is unlikely to impact on children or on their rights. It could be considered that the objective to appropriate conserve and manage the marine environment is of benefit to all children, outlined in the guiding principles of the UNCRC.
4) Is a full Children's Rights Impact Assessment required?

If you have identified impacts on children and their rights, a full CRIA should be completed. If no impacts are identified then a Full CRIA is not required, but please explain your rationale and how you reached this conclusion

Other than the overarching principle to improve the conservation and management of the environment, no specific impacts on children and their rights have been identified in respect of this proposition.
