St Clement

Constituency Statistics Report 2026

Introduction

This report brings together key statistics about the constituency of St Clement to help inform and support constituents ahead of the June 2026 elections in Jersey. By presenting clear, accessible data on the makeup of our community, the report aims to provide a useful snapshot of local demographics, social characteristics and housing trends relevant to voters, candidates and anyone with an interest in the constituency.

The information in this report has been sourced from Statistics Jersey, drawing primarily on the most recent [Jersey Census in 2021](#) and the [Jersey Opinions and Lifestyle Survey 2025](#). These statistics offer the most reliable and comprehensive picture of life within St Clement and cover areas such as population, age structure, employment, household composition and other key indicators that help illustrate the character of our constituency.

A full suite of detailed data for Jersey and each constituency is available on the [Statistics Jersey website](#), including interactive tables and further breakdowns to complement the summary contained in this document.

Through the careful compilation of these figures, this report aims to provide a clear and factual foundation for understanding our community as we look ahead to the 2026 election period.

Similar reports for other constituencies are available [here](#). Please note that these reports present key data for electoral constituencies for Deputies, rather than for individual parishes.
