Follow-up questions from the Quarterly Public Hearing 16th September 2026

Dear Minister,

Thank you for your attendance at our Quarterly Public Hearing on 16th September 2026. The Panel has identified a number of questions that it was unable to raise within the time available during the hearing, together with several follow-up questions arising from the evidence provided.

In addition, the Panel wishes to follow up on a number of information requests that were undertaken during the hearing. The Panel would be grateful if you could provide a response to the questions and requests set out below:

1. Delivering Investment in the Public Realm [[R.158/2024](#)] refers to a programme of public realm improvements delivered through the Public Realm and Movement Strategy and supporting policy frameworks. Can the Minister provide a list of the strategies, policies, action plans and other documents that currently inform the programme, together with their objectives, priority projects and delivery timelines?
2. Does the Minister intend to review or update the Public Realm and Movement Strategy and, if so, what is the anticipated timetable for this work?
3. The Panel would welcome a briefing on the Broad Street Public Realm Project. In advance of that briefing, can the Minister provide all relevant project documentation, including the project plan, business case, costs, funding arrangements, delivery timetable and consultation materials? The Panel also requests documentation relating to the proposal to relocate the apple press outside Marks & Spencer on King Street, including consultation responses, stakeholder feedback and details of the decision to retain the installation in its current location.
4. During the Quarterly Hearing, the Assistant Minister indicated that Jersey was the preferred bidder for the 2035 Island Games. However, the response to Written Question [WQ.166/2026](#) states that preferred bidder status will not be conferred until 2028. Can the Minister clarify the current status of Jersey's bid and provide copies of any strategy, facilities plans, bid documentation or submissions made to the International Island Games Association to date?

5. What progress has been made in increasing community use of school sports facilities through Memorandum of Understanding, Service Level Agreements or similar arrangements, and what further work is planned?
6. Can the Minister provide an update on Phase 1 of the Fort Regent redevelopment programme, including whether it remains on track in terms of scope, budget and delivery timescales, and how subsequent phases will be progressed?
7. Further to the Minister's commitment to provide a written update, can the Minister advise what progress has been made in reviewing the proposed drug-driving legislation and when revised legislation is expected to be lodged?
8. Can the Minister provide an update on active travel initiatives, including:
 - a) schemes planned or under development for 2027;
 - b) planned improvements by parish; and
 - c) work being undertaken by Jersey Sport to support bikeability and active travel programmes?
9. Following discussion during the Quarterly Hearing regarding cycle route diversions during sewer works, can the Minister provide an update on any changes under consideration?
10. With regard to delays within the Sewage Network Upgrade Programme, can the Minister provide details of the reasons for the delays, the costs incurred as a result, the contingency funding remaining and the measures being taken to avoid further delays or cost overruns?

The Panel notes your indication at the Quarterly Hearing that a further update on the development of waste charges would be provided at the next hearing and looks forward to receiving details of the options and delivery models under consideration.

The Panel would be grateful to receive an initial written update no later than 7th October 2026.

Please note that it is the Panel's intention to publish your response on the States Assembly website.

We look forward to hearing from you.

Yours sincerely,

Deputy Hilary Jeune
Chair, Environment, Housing and Infrastructure Panel
