

Draft Road Traffic Law (Drug Driving) (Jersey) Amendment Regulations 202-

End Cannabis Prohibition Jersey

Date: 9th February 2026

We note the publication of the Draft Road Traffic Law (Drug Driving)

(Jersey) Amendment Regulations 202- and request that the Environment, Housing & Infrastructure Panel undertakes scrutiny of this legislation.

The community has a number of concerns relating to the draft law, namely that:

- The law applies only to THC and not any other controlled cannabinoids or other drugs.
- There is no medical defence for medicinal cannabis patients (as in the UK and Guernsey).
- There is no viable method currently available to deduce cannabis impairment from bodily fluids.

End Cannabis Prohibition Jersey and our community members would greatly appreciate an opportunity to voice our concerns about this legislation.
